

Assignment - 2

In this assignment, you need to create **your own personal website** using HTML + CSS. Now you have absolute freedom to design your website with CSS. It should be a site about **YOU** (personal site, resume, blog, portfolio). You can continue working on Assignment-1 simply by adding CSS.

Good luck!

Criteria for grading the assignment:

<ul style="list-style-type: none">- Use External CSS.- Use CSS Selectors: tags, classes, ids.- Use at least HTML div, span, table, form, h1, p, img, a.	25%
<ul style="list-style-type: none">- Create your own favicon and use it on your website.- Use paddings, borders, margins;	25%
<ul style="list-style-type: none">- Use CSS Position property, CSS Display property.	20%
<ul style="list-style-type: none">- Use CSS Float and Clear.	10%
<ul style="list-style-type: none">- Your website should be logical and structured. (If there will be just a bunch of unlogical information without any meaning, then you won't get 10%.) Create a website that you yourself would like to visit.	10%
<ul style="list-style-type: none">- Solve Challenge-3, Challenge-4 from Intermediate CSS lecture.	10%
Overall you can get	100%
